

# BAXTER BARN

LOCAL AND FAMILY OWNED SINCE 1875

Hello!

I'm Cory, and my wife Missy and I are the proud owners of Baxter Barn. We live with our children on our beautiful 2.5 acre farm in Fall City. With help from the whole family, we lovingly raise a variety of animals including chickens, horses, rabbits, pheasant and mini-donkeys.

Over the last year, working with the King Conservation and King County, we have restored the land to a "clean farm" through true conservation methods. Baxter Barn is now listed on Washington State's Heritage Barn register.

Our mission is to demonstrate sustainability and conservation on a historical farm where domesticated plants and animals are as important as native plants and wildlife.

We hope you enjoy our high-quality products as much as we enjoy supplying them.

Thank you for your support,

Cory Huskinson

"Cory & Missy's unrestrained vision has provided the community with an educational farm and resource for future generations. Well done!" - Vivian

## BAXTER BARN NATURAL HORSE SUPPLEMENT

### 50 LB BAG

Our Natural Horse Feed is a complete feed that is designed to fulfill the diverse requirements of many different kinds of horses. It contains pro-biotics and pre-biotics with a complete nutritional diet of organic vitamins and organic/inorganic trace minerals. It is high fat and protein and low in starch, sugar and carbs.

Current feed on the market only fulfills the minimum requirements of nutrition and typically uses fillers and less vitamins. Horses have a nutritional requirement set by the NRC and our Ration Balancer addresses those deficiencies. We are one of the few feed producers to use a fixed formulation so the amount of each ingredient doesn't vary, providing a consistent product for optimum horse health and reduced digestive upset.

**Does not contain corn, soy or molasses**

Market feed price-points are affected by protein and vitamin costs. Our feed is consistently 14% protein, low intake, low sugar, low starch and contains no corn or soy. It contains ground flax seed, pre-biotics and pro-biotics.

### FEEDING TIPS

Feed along with forage. One pound (based on 1000 lb. body weight) per day. Foal  $\frac{3}{4}$  pound (based on 1000 lb. body weight) per day. Extreme/active 1  $\frac{1}{4}$  pound (based on 1000 lb. body weight) per day. Provide clean and fresh water, and free choice iodized salt at all times.

### BAXTER BARN ENERGY PELLETS

A secondary product to use with horse feed to gain/maintain weight for working horses, growing horses, seniors, or just to add weight.  
Ingredients: Ground Beet Pulp, Hay, Rice Bran, Ground Flax, Oat Hulls, Vegetable Fat

## WHAT MAKES OUR FEED SO UNIQUE?

OUR FEED GOES BEYOND THE AVERAGE NUTRITIONAL REQUIREMENTS AND CONTAINS THE FOLLOWING:

- Extra Zinc, Methionine, Lysine and Biotin for strong and healthy hooves
- Fortified for balanced nutrition
- A variety of enzymes to help digest fiber and better digest the feed
- A MOS product to help improve gut function and immune response
- A toxin binder to combat myco-toxins that are often present in other feeds
- Chelated trace minerals to help absorption of nutrients
- Selenium, in the form of Selenium Yeast which is more readily utilized by the animal
